

CUSTOMER STORY

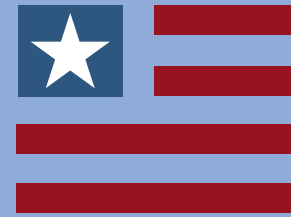

Reduce Shrink and Handle Investigations Remotely with OWS

"The operational benefits of OpenEye have enabled us to reduce operational shrink while building the value of the loss prevention department throughout the organization. Our senior leadership has been especially appreciative of our ability to help the company make better business decisions and driver operational improvements. Our other departments now consider the loss prevention department to be a true business partner."

Joe Laufenberg

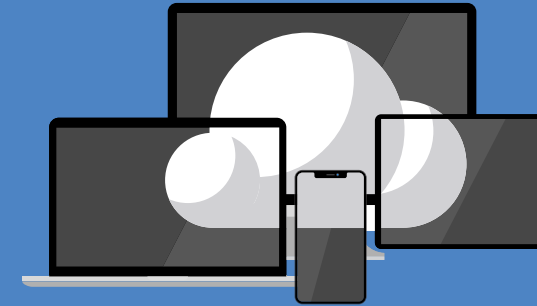

Director of Loss Prevention, Festival Foods

OpenEye is committed to producing products and software in the US. Although not all of our products are made in the USA, we make every effort possible to produce quality affordable solutions in house.

All OpenEye Web Services platform software is developed in our facility located in Liberty Lake, Washington. We also employ all in-house technical support personnel and manufacture a broad range of made in the USA camera accessories and assembled in the USA recording hardware for use with our software.

OpenEye Web Services is a scalable and secure video surveillance solution that simplifies operations and management by moving these functions to a cloud-based platform.

Combining the performance and reliability of local recording with the convenience and flexibility of the cloud, OWS produces a greater return on your investment, saves you time, and provides an easier, more secure surveillance solution.

OpenEye®

THE CLOUD VIDEO PLATFORM

Across the globe, retail store operators of all sizes choose OpenEye to meet their surveillance and loss prevention needs.

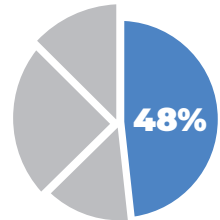

OpenEye Web Services (OWS) combined with SaleGuard deters theft, reduces internal fraud and generates valuable business intelligence for retail stores nationwide. Our powerful cloud-managed video platform gives you the tools you need to get a better return on your loss prevention efforts and improve customer satisfaction while reducing the burden on IT and Operations.

- Reduce Risk
- Increase Intelligence
- Streamline Operations
- Reduce Your IT Burden

THE COST OF SHRINK

\$45B

\$45.2 Billion in US retail economy's inventory shrink costs.¹

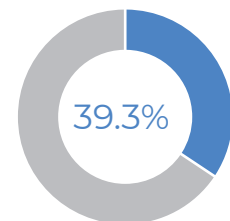

48% of retailers reported an increase in inventory shrinkage.¹

1.72% shrink rate average for retailers operating between 1001-2000 stores.¹

\$2.40

\$2.40 burden on merchants, for every dollar of fraud costs (up from \$2.23 in 2015).²

39.3% of inventory shrinkage came from shoplifting.¹
