SALEGUARD POINT-OF-SALE ANALYTICS SOFTWARE

Grocery Loss-Prevention Solution

Your Bottom Line is Our Top Priority

Effective loss prevention is reflected in every aspect of your business. By helping you minimize profit shrink, SaleGuard from OpenEye helps to increase productivity, improve morale, promote efficiency, and raise your bottom line by saving you money you might not have known you were losing.

SaleGuard is point-of-sale analytics software from OpenEye. When combined with OpenEye surveillance solutions, SaleGuard offers unique and effective tools to combat shrink and increase profits. The key to SaleGuard's effectiveness is Exception-Based Reporting, along with a wide assortment of pre-packaged reports, customizeable alert options, and data search capabilities, combined with professional video surveillance from OpenEye cameras and recorders.

SOLUTIONS

- » Pre-packaged reports
- » Integration with OpenEye video surveillance solutions
- » Customizable reports
- » Receipt data combined with video
- » Printable, graphic reports
- » Broad POS terminal compatibility
- » Intuitive search capability
- » 24/7 technical support*

OPENEYE IN ACTION
Festival Foods Uses SaleGuard to Reduce Shrink

By using SaleGuard's powerful data searching capabilities, loss prevention managers at Festival Foods are able to track customer theft at self-checkout stations. By combining receipt data with video, they can see when a customer rings up cashews as sesame sticks, or other methods of theft.

With 18 locations, Festival Foods employed SaleGuard Point of Sale analytics software to help with loss prevention for fast, effective results.

SaleGuard's advanced search capabilities helped Festival Foods to catch one repeat offender who had stolen $600 in merchandise over two weeks and get restitution for that loss. "It helps us catch these things much faster than we normally would," said Joe Laufenberg, Festival Foods' Director of Loss Prevention, "Which makes us much more profitable."
